

Treatment Packages 2017

MSC STEM CELL PACKAGES

Option 1:

Initial Treatment Period: 7-10 days

Price: \$35,000 USD

Number of Stem Cells: 100,000,000

Procedure/Treatment	Quantity	Commission
Comprehensive health check up	1	
IV infusions of cells	4	
Local injections to effected parts of body (joints,muscles, etc)	2	
IV medical laser cell stimulation	6	
Tissue medical laser cell stimulation	6	
IV oxygen therapy	6	
Peptide/growth factors injections	8	
Enzyme injection set	2	
Take home 1 month nutrition / hormone set / topical growth factor	2	

Option 2:

Initial Treatment Period: 14 days

Price: \$55,000 USD

Number of Stem Cells: 200,000,000

Procedure/Treatment	Quantity	Commission
Comprehensive health check up	1	
IV infusions of cells	4	
Local injections to effected parts of body (joints,muscles, etc)	2	
IV medical laser cell stimulation	10	
Tissue medical laser cell stimulation	10	
IV oxygen therapy	10	
Peptide/growth factors injections	12	
Enzyme injection set	2	
Take home 1 month nutrition / hormone set / topical growth factor	3	

DONOR SOURCE STEM CELLS: MSC STEM CELL PACKAGES

Single point of interest:

Examples of package:

- Erectile dysfunction (local injection program)
- Single Joint - Knee, Hip, Shoulder, Neck, Back (local injection program)
- Facial Rejuvenation (local injection program)
- Scalp / Hair Rejuvenation (local injection program)

Option 1: 50,000,000 MSC

5 day program = \$18,000 USD

Procedure/Treatment	Quantity	Commission
Health check up	1	
Local injections to effected parts of body (joints,muscles, etc)	2	
Tissue medical laser cell stimulation	5	
IV oxygen therapy	5	
Peptide/growth factors injections	5	
Enzyme injection set	1	
Take home 1 month nutrition / hormone set / topical growth factor	2	

Option 2: 25,000,000 MSC

3 day program = \$9,500 USD

Procedure/Treatment	Quantity	Commission
Health check up	1	
Local injections to effected parts of body (joints,muscles, etc)	1	
Tissue medical laser cell stimulation	3	
IV oxygen therapy	3	
Peptide/growth factors injections	3	
Enzyme injection set	1	
Take home 1 month nutrition / hormone set / topical growth factor	1	

IMMUNOTHERAPY: IMMUNE / NK CELL BANKING

Focus of Therapy:

- Immune Cell Banking - store you healthy immune cells for when you need them
- Cancer - As stand alone treatment or in combination with PDT
- Immune boosting - for patients with low immunity and low NK cytotoxicity levels

Procedure/Treatment	Quantity	Commission
Immune cell boosting therapies prior to blood drawing	4	
Collection of blood and immune cell purification	1	
Inducing NK cell processing & expansion	1	
Batches of NK cell cryopreserved	4	

\$10,500 USD including storage for 3 years (additional storage fees are applied after)

Therapeutic usage of Banked Immune Cells: (4 sessions available)

Procedure/Treatment	Quantity	Commission
Infusion of 1 batch of Immune/NK cells	1	
IV laser therapy	5	
IV Oxygen therapy	5	
IV nutriton	2	
Peptide injections	5	

\$6500 USD per session

SUPPORTIVE THERAPIES

With all of our programs a supportive therapy package will be given. This selection of treatments is carefully chosen to optimise the desired cellular mechanisms and to improve your bodies microenvironment. The main supportive therapies are:

- IV and Local tissue laser therapy - to adjust levels of cellular activity by using BioPhoton therapy
- IV Oxygen therapy - in increase levels of blood oxygen
- Peptides / organ extracts - increase repair signals from selected tissues.
- Nutrition / Hormones - replenish or adjust levels in the body to improve desirable effects.

ACCOMMODATION:

Our guests benefit from preferential rates at the AETAS hotel & residence, which our medical facility is located also. Room options from studio type to 3 bedroom suites are available, including daily breakfast & wifi.
