EGG DONATION PROGRAMS

Egg donation programs have been practiced by our clinic for 13 years with a great passion and care in order to assist people with fertility problems from all over the world who can not become parents otherwise.

We offer both fresh egg donation cycles and cycles with vitrified donor oocytes, which are immediately available at Intersono bank of vitrified oocytes – the first bank of vitrified oocytes in Ukraine.

The key advantages of our egg donation program:

- a broad donor database of 200 completely screened donors with various phenotypes who are available for fresh cycles
- all donors available in our data base have proven fertility
- 1000 of vitrified oocytes available at our Bank
- on line donor catalog and a 3-days free access to the whole donor database

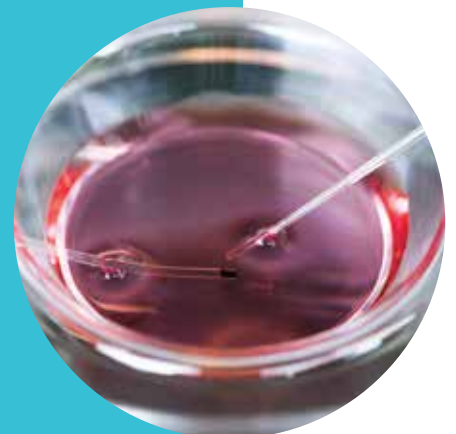

We guarantee:

No egg sharing in fresh egg donor cycles

No less than 12 mature oocytes, 8 zygotes and 2 blastocysts for transfer

89% survival rate, 76 % fertilization rate and 2 blastocysts for transfer in cycles with vitrified donor oocytes

61% clinical pregnancy rate

EGG DONOR CATALOG

PATIENT SUCCESS STORIES

When you see a new life, it is difficult to know what to say to the people who made it happen... But a simple 'thank you' has so much meaning within it, especially when it is genuine and heartfelt. THANK YOU!

J. S. And Ax

There are TWO. 2heartbeats, 2 gestational sacs, 2 perfect little embryos measuring exactly correct. I am still in shock but VERY happy. Wow!

Paola

I hope you will again accept my deepest gratitude for the joy you and the doctor and embryologist and donors have given me with my wonderful daughter, Emma. She had her first birthday on the 21st of July. She is pulling up to a stand (I think she will walk within a few weeks) and is getting her teeth in. She is a very happy, joyous child who loves music! She laughs and does a "wiggle dance" when she hears music. She is very clever, I think, always figuring out how things work. I wonder if she might become an engineer. She is cuddly and a true joy. Everyone loves her. She is really funny too!

I just want you all to know that she is the love of my life and doing great!

Dxxx

Well its 2 weeks since you looked after me so well in Ukraine. I have done 13 pregnancy tests since last Tuesday 26th July and they are all positive!!!! We are over the moon. I am booking an early scan for 3 weeks time and will let you know the result. Many thanks again for everything.

L&R

Good day Lyutcyna, It has been a really long time since I sent you an update on our girls. They are now 2 1/2 and 4 1/4 years old. I cannot believe how time is flying. They are both beautiful, smart, funny and happy little girls. I am pretty much in awe of them. They also really love each other and it is so wonderful to see them share and play together.

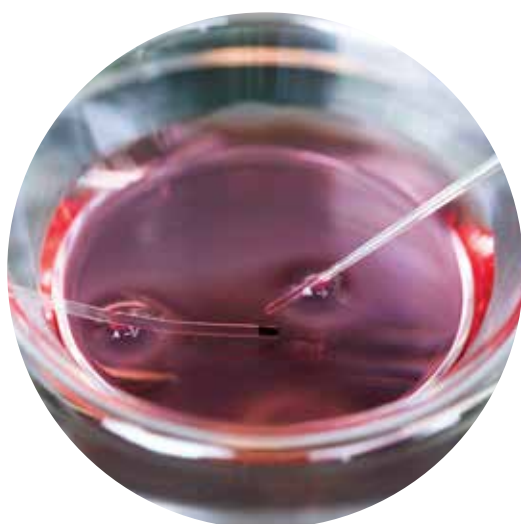

Jane

VITRIFICATION

Vitrification of human oocytes opens new perspectives in IVF treatment and offers a wider range of fertility treatment programs.

The perfect command of vitrification technique enabled us not only to create the First bank of vitrified donor oocytes; we have also launched a Social freezing program for women over 35 who have made the decision to postpone the happiness of motherhood for the future.

First in Western Ukraine began to provide unique service - Cryopreservation of ovarian tissue, which helps keep the reproductive function of women with cancer and gives the opportunity to give birth to their own children, even after undergoing chemotherapy.

SURROGACY

Surrogacy Department successfully operates since 2005. During this time 187 cycles were conducted and 124 children were born, which shows high level efficiency of these infertility treatment programs, held at our clinic.

Our patients choose us because:

We act legally! Surrogacy in Ukraine is regulated by law.

We act openly! All uncertainties are agreed before the start of the program; only then the documents are signed.

We care about the safety of the future child! We guarantee that the surrogate mother is 20 to 36 years old, is fully healthy - physically and psychologically, has at least one own healthy child, have no hereditary illnesses.
